6.Cart & Checkout Pages flow

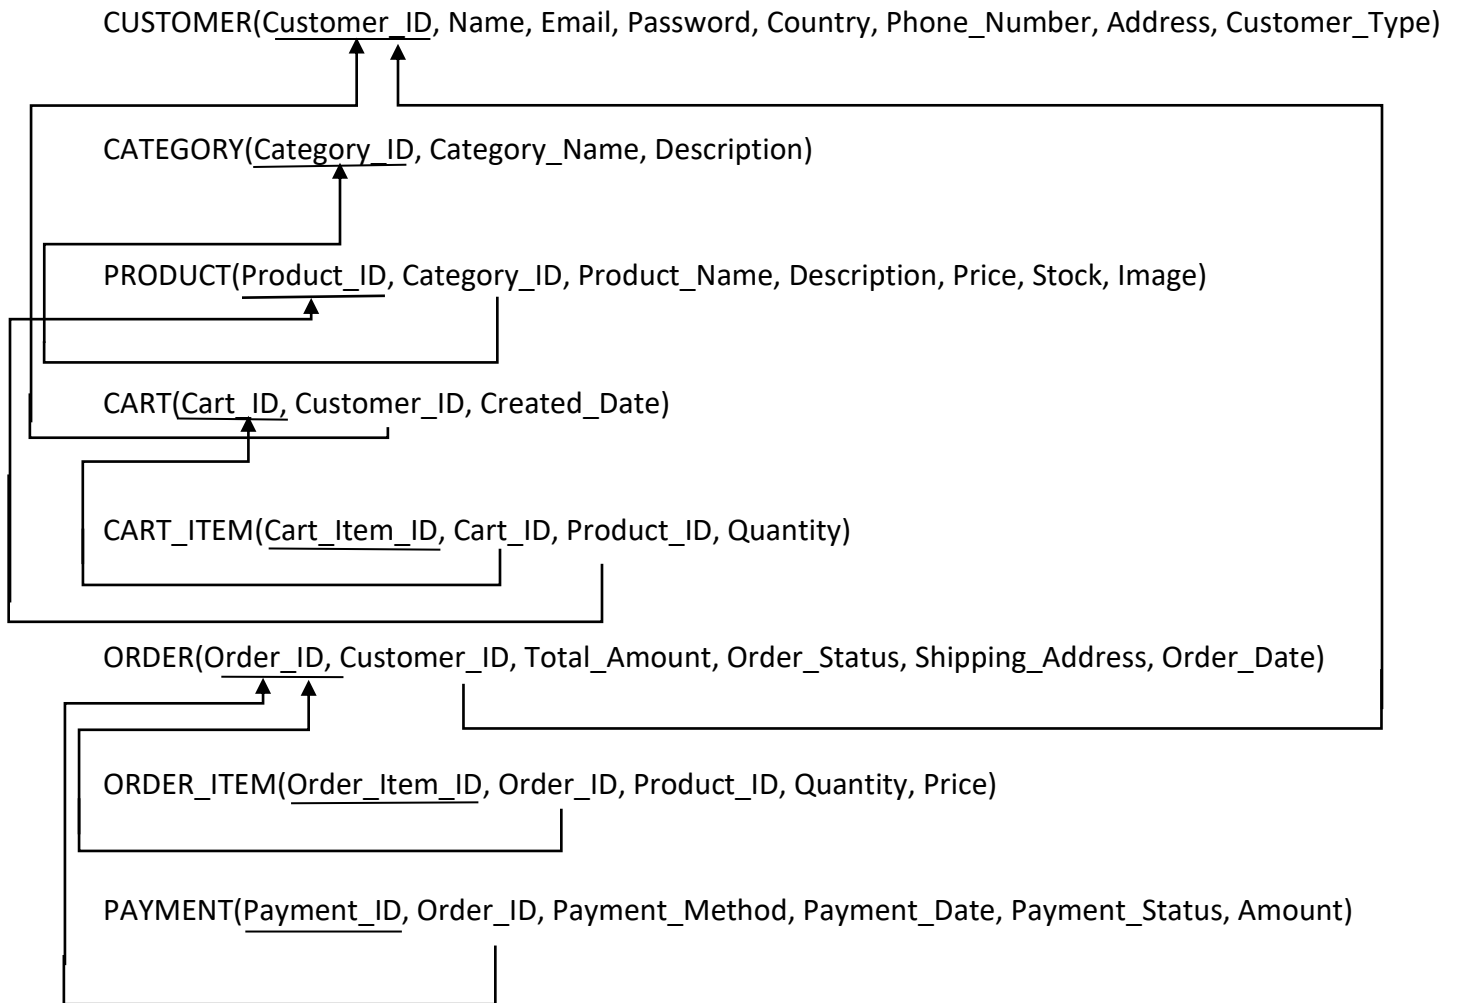

Customer → Browse → Select → Cart → Checkout → Shipping Details → Payment → Review
→ Place Order → Payment Processing → Confirmation → Database

- The cart and checkout process allows customers to browse and select products, add products to the shopping cart, update quantities or remove products, and proceed to checkout. During checkout, the customer provides shipping information and selects a payment method. The order details are then reviewed and confirmed before payment processing. Once the payment is successfully processed, an order confirmation is generated and the order details are stored in the database.
